CARBURETOR “QUICK KIT” PRICE REDUCTION

The Consolidated Fuel Systems “Quick Kit” program is now 3 years old and has become the overhaul kit of choice by technicians who make their living overhauling aviation fuel systems.

In a continuing effort to address the needs of our customers, Consolidated Fuel Systems has continued to communicate with these professionals and solicited their opinions and ideas on ways to improve these kits. One suggestion which was brought to our attention, is that we eliminate the throttle arm and pump discharge valve therefore reducing the cost of most of the carburetor “Quick Kits.” You asked for it and we did it. By eliminating these two parts we were able to reduce the cost of the “Quick Kits” by a substantial amount. If you have a need for these two parts, they can still be purchased individually.

Consolidated Fuel Systems “Quick Kits” still contain all the mandatory replacement parts, plus the parts used by fuel professionals to insure the job is done right! If you have any further questions, please feel free to give us a call and thank you for purchasing Consolidated Fuel Systems “Quick Kits.”

“QUICK KIT”	LIST PRICE
CF286-00*	\$ 228.00
CF286-01**	\$ 296.00
CF286-02**	\$ 296.00
