

SALES BULLETIN

An Official Bulletin From Consolidated Fuel Systems, Inc.

Date: 5/2/00

Subject: Consolidated Fuel Systems, Inc. Overhauled
Romec / Crane Fuel Pump Product

Contact: Sales Department

Summary: Lycoming has issued a Mandatory Service Bulletin No. 539 dated March 16, 2000, which requires the replacement of the current valve housing with a newly designed valve housing. Due to this Service Bulletin, many aircraft operators will be required to bear an additional cost when overhauling their fuel pump. The Crane / Romec gasket design allowed the possibility of seepage from the current valve housing. In a continuing effort to provide our customers with quality products at affordable prices, Consolidated Fuel Systems Inc. will offer our customers two versions of these fuel pumps. Consolidated Fuel Systems has been using an improved gasket design in our fuel pump overhauls for many years. We will continue to offer our high quality overhauled pumps to our customers who do not need to comply with this bulletin at our current price structure. For our customers who need to comply with this bulletin, we are now able to offer you a quality overhauled fuel pump with the newly designed valve housing at a very competitive price.

Ordering: Pumps incorporating the new style valve housing will be identified with the same part number followed by the Suffix /M. For example: RG9080J4A/M. **Pumps not incorporating the new style valve housing will remain the same price and part number configuration. For example: RG9080J4A at a list price of \$775.00.**

New Style Pumps Affected and Pricing:

List Price:

RG9080F2/M, RG9080J4A/M, RG9080J6A/M,
RG9080J7A/M, RG9080J8A/M

\$1400.00

RG9570K1/M, RG9070P/P1/M

\$1400.00

RG17980/M, RG17980A/M, RG17980D/M
RG17980E/M, RG17980J/M, RG17980K/M
