Service Bulletin

Bulletin No. 021

Issue Date: February 26, 2004

Technical Content is FAA Approved

SUBJECT:

- 1) Notification of the applicability of the Kelly Aerospace OE-A2 Starter and Alternator Overhaul Manual.
- 2) Notification that the OE-A1 Overhaul Manual is superceded and obsolete.

REASON:

To notify and clarify the relevant IFCA data to be used for the overhaul of Kelly Aerospace Electrical accessories.

PRODUCTS

AFFECTED:

All Kelly Aerospace Electrical Accessories (Starters & Alternators)

COMPLIANCE:

Effective Immediately

OE-A2 Overhaul Manual (Starters & Alternators)

On May 1, 2003, Kelly Aerospace Power Systems, Inc. released new IFCA (Instructions for Continued Airworthiness) data to be used to overhaul and maintain various electrical accessory components manufactured by Kelly Aerospace Power Systems. This OE-A2 Overhaul Manual supercedes and replaces the OE-A1 Manual originally issued by Prestolite Electric Company several years ago.

THE OE-A2 MANUAL OBSOLETE AND SUPERCEDES THE OE-A1 MANUAL

Kelly Aerospace has been advised by the FAA that field overhaul facilities have been reported to be continuing to use the OE-A1 Manual information and data to overhaul starters and alternators even though they have acquired subscriptions to the superceding OE-A2 Manual and/or are aware of the availability of the new IFCA data (OE-A2 Manual) and its applicability.

This bulletin is intended to clarify the fact that the OE-A1 Manual is obsolete and superceded, and cannot be used as the FAA approval basis for component overhauls. All OE-A1 Manuals should be discarded or clearly marked "OBSOLETE".

For those organizations which have not yet subscribed to the new OE-A2 Manual, it can be ordered through the Kelly Aerospace Customer Service/Sales Group by calling toll free, 877-359-5355, or 334-286-6994. The initial subscription price includes one year of revisions.
